

## Data (1)

The head of the Galactic  
Confederation (76 planets around  
larger stars visible from here)  
(founded 75,000,000 yrs ago, very space opera)  
Solved overpopulation (250 billion  
or so per planet - 178 billion on  
average) by mass implanting.  
He caused people to be brought to  
Teegeetack (Earth) and put on H Bomb  
on the principal volcanoes (Incident 2)  
and then the Pacific area ones  
were taken in boxes to Hawaii  
and the Atlantic area ones to  
Las Palmas and there "packaged."  
His name was Xenn. He used  
renegades. Various misleading  
data by means of circuits etc.  
was placed in the implants.  
When through <sup>with his crime</sup> royal officers  
(to the people) captured him  
after 6 years of battle  
and put him in an electronic  
mountain trap where he still <sup>(confed)</sup>  
is. They are gone. The place  
has since been a desert.

## Data (Cont) - 2 -

The length and brutality of it all was such that the Confederation never recovered. The implant is calculated to kill (by pneumonia etc) anyone who attempts to edit it. This liability has been dispersed with my tech development.

One can FREE WHEEL through the implant and die unless it is approached as precisely outlined. The "free wheel" (auto running on and on) lasts too long drives sleep etc and may die. So be careful to do only incidents 1 & 2 as given and not play around and ~~find to complete one Q<sup>n</sup> at a time.~~  
In December 67 I knew somebody had to take the plunge. I did and emerged very knocked out

but alive. Tech Data (3)  
only one ever to do so in  
75,000,000 years. I have  
all the data now but only  
that given here is needed.

One's body is a  
mass of individual  $\text{O}^{\text{H}}$ 's  
stuck to oneself or to the  
body.

One has to clean them  
off by running Incident One  
then Incident Two. It is  
a long job, requiring care,  
patience and good  
audibility.

you are running beings.  
They respond like any  
preclear. Some large, some  
small.

They've believed they  
were me. This is the  
primary error.  
Good luck.
